

# Hammurabi's Code: Was It Just?

Nearly 4,000 years ago, a man named Hammurabi became king of a small city-state called Babylon. Today Babylon exists only as an archaeological site in central Iraq. But in Hammurabi's time, it was the capital of the kingdom of Babylonia.

We know little about Hammurabi's personal life. We don't know his birth date, how many wives and children he had, or how and when he died. We aren't even sure what he looked like. However, thanks to thousands of clay writing tablets that have been found by archaeologists, we know something about Hammurabi's military campaigns and his dealings with surrounding city-states. We also know quite about every day life in Babylonia.

The tablets tell us that Hammurabi ruled for 42 years. For the first 30 of these years, Hammurabi's control was limited mostly to the city of Babylon. He was involved in what one historian calls, "lots of squabbles with other small kings in other small city-states," some of them no more than 50 miles away. This changed, however, with victories over Larsa in the south and Mari in the north, Hammurabi became the ruler of much of Mesopotamia.

Hammurabi was not starting with a blank slate. Beginning around 3500 BCE, the Sumerian people had developed Mesopotamia into the world's first civilization. By the time Hammurabi took power in 1792 BCE, cuneiform writing had already been around for 1,700 years.

Hammurabi would eventually rule over an estimated population of 1,000,000. Most of his subjects were farmers. The people lived in city-states surrounded by fields and watered by irrigation canals that were fed by the Tigris and

Euphrates rivers.

After his victories at Larsa and Mari, Hammurabi's thoughts of war gave way to thoughts of peace. These, in turn, gave way to thoughts of justice. In the 38th year of his rule, Hammurabi had 282 laws carved on a large, pillar-like stone called a stele. Together, these laws have been called Hammurabi's Code. Historians believe that several of these inscribed steles were placed around the kingdom, though only one has been found intact.

Hammurabi was not the first Mesopotamian ruler to put his laws into writing, but his code is the most complete. By studying his laws, historians have been able to get a good picture of many aspects of Babylonian society - work and family life, social structures, trade and government. For example, we know that there were three distinct social classes: land owners, free people who did not own land, and slaves. The many farm and irrigation laws tell us that

Babylonians depended upon their crops for survival. The code also tells us of every day problems, like building collapsing, oxen getting loose and trampling fields, and neighbors squabbling, much as they do today. Hammurabi tried to bring order and fairness to it all.

What follows are five documents that provide a sampling of Hammurabi's laws. Some students of Babylonia have found the laws overly harsh. Others have found them to be quite balanced, given the hard realities of ancient life.

In this activity, you are asked to consider justice on three levels: fairness to the accused, fairness to the victim, and fairness and security for society. With this measuring stick in mind, read the documents and answer the question: ***Hammurabi's Code: Was it just?***

## DOCUMENT A

**Source:** Stone stele of Hammurabi's Code from the ancient artifacts collection of the Louvre Museum in Paris, France, circa 1754 BCE.

**Note:** The stele, carved from black diorite, stands more than eight feet tall and weighs four tons. This photograph shows the top third of the stele.

The carving at the top of the stele shows Hammurabi standing before Shamash, the god of justice, who is seated on his throne. Shamash is instructing Hammurabi in the law.

Below the two figures is the Prologue, in which Hammurabi lists the names of the gods, saying that they have given him the right to rule. The Prologue, like the rest of the code, is written in wedge-shaped cuneiform letters that have been carved into the stone.

Below the Prologue, close to the base, are the 282 laws, organized by theme, including family life, agriculture, theft and professional standards. There are a total of 2,500 lines of writing, covering both sides of the stele.

Following the laws is an Epilogue in which Hammurabi states how the laws should be carried out.

... Hammurabi, the protecting king am I. ... That the strong might not injure the weak, in order to protect the widows and orphans, ... I set up these my precious words, written upon my memorial stone, before the image of me, as king of righteousness.

... By the command of Shamash, the great god and judge of heaven and earth, let righteousness go forth in the land. ... Let no destruction befall my monument ... let my name be ever repeated; let the oppressed, who has a case at law, come and stand before this my image as king of righteousness; let him read the inscription, and understand my precious words.

... In future time, through all coming generations, let the king, who may be in the land, observe the words of righteousness which I have written on my monument; let him not alter the law of the land which I have given.

... If this ruler does not esteem my words, ... if he destroys the law which I have given, ... may the great gods of heaven and earth ... inflict a curse ... upon his family, his land, his warriors, his subjects, and his troops.
